

Table of Contents

SECTION I: Characteristics and sources of different airborne pollutants

1. Airborne dust in livestock buildings

Steven J. Hoff

1.1 Introduction

1.2 Particulate sources and fractional characteristics

1.3 Indoor particulate matter concentrations

1.4 Summary of comprehensive animal and poultry housing PM studies

1.5 Conclusion

2. Lagoon characteristics and ambient hydrogen sulfide concentrations at a swine feeding facility

Albert J. Heber

2.1 Introduction

2.2 Literature review

2.3 Methodology

2.4 Results and discussion

2.5 Summary and conclusions

3. Ammonia and hydrogen sulfide in swine production

Ji-Qin Ni, Albert J. Heber and Teng-Teoh Lim

3.1 Introduction

3.2 Ammonia in swine production

3.3 Hydrogen sulfide in swine production

3.4 Discussion and conclusions

4. Pollutants in livestock buildings: Ammonia and dust interplay with the respiratory tract

Annamaria Costa and Cinzia Domeneghini

4.1 Ammonia in piggeries: concentrations and effects on animal's health and performance

4.2 Particulate matter: origin, classification, deposition in the respiratory system and effects on animal health and production

4.3 Concept of secondary particulate matter: from gases to PM formation

SECTION II: Measurement issues

5. Gaseous emissions of bedded pack barns with wood chips and compost as bedding material

Hendrik Jan van Dooren, Francis Sanderink, Annemieke Hol and Paul Galama

5.1 Introduction

5.2 Materials and methods

5.3 Results

5.4 Discussion

5.5 Conclusions

6. Seasonal variability of the PM and ammonia concentrations in uninsulated loose-housing cowshed

Marek Maasikmets, Erik Teinmaa, Allan Kaasik and Veljo Kimmel

6.1 Introduction

6.2 Materials and methods

6.3 Results and discussion

6.4 Conclusions

7. Air quality and factors related to sub-optimal pig housing conditions in nursery and finishing rooms: A field study in 143 French herds
Christelle Fablet, Fabrice Bidan, Virginie Dorenlor, Florent Eono, Eric Eveno, Nicolas Rose and François Madec

7.1 Introduction

7.2 Material and methods

7.3 Results

7.4 Discussion

7.5 Conclusions

SECTION III: Pollutant levels encountered in livestock buildings

8. Temperature, relative humidity, noise, dust and odor levels recorded on free-range piggery sites in three states of Australia

Thomas Banhazi

8.1 Introduction

8.2 Materials and methods

8.3 Results and discussion

8.4 Conclusions

9. Airborne pollutant concentrations within and emission rates from Australian piggery buildings

Thomas Banhazi

9.1 Introduction

9.2 Material and methods

9.3 Results

9.4 Discussion

9.5 Conclusions

10. Microclimate and air quality in uninsulated loose-housing cowsheds in temperate climate conditions

Allan Kaasik and Marek Maasikmets

10.1 Introduction

10.2 Materials and methods

10.3 Results and discussion

10.4 Conclusions

SECTION IV: Effects of sub-optimal air quality on workers, animals and the environment

11. Intensive livestock housing: a review: Preventing occupational respiratory hazards for workers

Kelley J. Donham

11.1 Introduction

11.2 Which hazardous dusts and gases are found in ILHs?

11.3 Who is exposed to these dusts and gases, and when?

11.4 How commonly does excessive exposure occur?

11.5 Respiratory effects of inhaling ILH dusts and gases

11.6 Diagnosis

11.7 Treatment

12. The effect of air quality in livestock buildings on the occupational health of farm workers

Thomas Banhazi and Dino Pisaniello

12.1 Introduction

12.2 Materials and methods

12.3 Results

12.4 Discussion

12.5 Recommendations

13 Dust dispersion modeling of fugitive emissions from piggeries

Thomas Banhazi

13.1 Introduction

- 13.2 Methodology
- 13.3 Results and discussion
- 13.4 Conclusions

14 The effects of atmospheric ammonia during export of livestock

Yu Zhang and Clive J.C. Phillips

- 14.1 Introduction
- 14.2 Source of atmospheric ammonia during live export
- 14.3 Atmospheric ammonia levels during live export
- 14.4 Effects of ammonia on livestock during live export
- 14.5 Threshold levels of atmospheric ammonia for humans
- 14.6 Threshold levels of atmospheric ammonia for animals
- 14.7 Conclusions

15 Hygiene and cleanliness in pig buildings as preventive medicine to ensure healthier animals

Christelle Fablet

- 15.1 Introduction
- 15.2 Influence of hygiene and cleanliness on pig health
- 15.3 Hygiene to ensure food safety and quality
- 15.4 Hygiene, health and air quality in buildings
- 15.5 Current means to attain hygiene in pig production and the need to implement better hygiene
- 15.6 Cleaning and disinfection procedures in pig buildings
- 15.7 Conclusions

SECTION V: Reduction methods Controlling internal concentrations and emissions from the animal buildings

16 Controlling the internal concentrations of gases and odor within and emissions from animal buildings

Jens Seedorf

- 16.1 A general view on airborne pollutants – an introduction
- 16.2 A brief description of relevant gases and odor
- 16.3 Control and reduction measures
- 16.4 Final remarks

17 Controlling the internal concentrations of particulate matter within and emissions from animal buildings

Jens Seedorf

- 17.1 The characteristics of airborne particles at a glance
- 17.2 Control and reduction measures
- 17.3 Final remarks

18 Emission reduction from livestock buildings using a filtration device

Thomas Banhazi

- 18.1 Introduction
- 18.2 Materials and methods
- 18.3 Results and discussion
- 18.4 Conclusions

19 Effect of electrostatic precipitation on particulate matter emissions from a high-rise layer house

Teng-Teoh Lim, Chaoyuan Wang, Albert J. Heber, Ji-Qin Ni and Lingying Zhao

- 19.1 Introduction and objective
- 19.2 Methods and procedures
- 19.3 Experimental design
- 19.4 Results and discussion
- 19.5 Conclusions

SECTION VI: Reduction methods and technologies for controlling airborne pollutants

20 Oil-spraying technologies to be used for dust reduction in livestock buildings

Hisamitsu Takai and Thomas Banhazi

20.1 Introduction

20.2 Fundamentals for designing oil-spraying for dust control

20.3 Strategy of the oil-spraying operation

20.4 Different types of oil-spraying systems

20.5 Review of studies reported previously

20.6 Recommendations for future studies

21 Housing index development for a holistic air quality evaluation: A preliminary framework

Jens Seedorf

21.1 Introduction

21.2 The concepts of air quality indices

21.3 Conclusions

22 Computer-based management of air quality data: Development of a software system

Thomas Banhazi

22.1 Introduction

22.2 General description of the software

22.3 Description of the main functionalities of the BASE-Q software

22.4 Description of the main functionalities of the Pocket BASE-Q program

22.5 Conclusion
